

## NokePro Instructions for the Boat Launch

A new padlock has been installed at the boat ramp which will require a slightly different method to open. Since this is an upgraded lock, NokePro recommends that you delete your current NokePro app and then reinstall it on your phone. Doing this reinstall will prevent possible issues opening the lock.

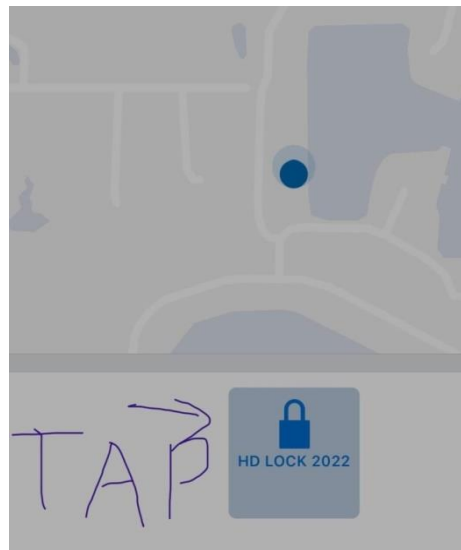

You no longer press the shackle into the lock base. See the new opening process below.

### New Procedures to Open the Lock

1. Open NokePro app and have Bluetooth and Cellular activated.
2. (New) Touch the button on the bottom of the padlock.

3. On the NokePro HomePage, touch the Blue HD LOCK 2022 icon. When it turns Green, the lock has opened.

Remember to lock the cable to post after unloading/loading your boat.
