AFFECTIVE MONDAY AUGUST 5ᵗʰ, 2024, the NokePro app will no longer work at the Boat Ramp. All current Users must download the NYCKEL app from their phone App Store.

STEPS TO TAKE PRIOR TO   USING THE BOAT RAMP

1. Download the **NYCKEL** app from Apple/Androit App Store.

2. On the sign in screen, Sign in using your mobile phone number, **not** your email address. Your phone number will sync with the one in the NYCKEL SmartLox Master Data Base. Active user cell phone numbers have already been entered in the Data Base.   (If the cell phone number that you entered is not "valid " contact that System Administrator below).

Performing the steps above will avoid issues that users may incur when trying to use the boat launch.

STEPS TO TAKE WHEN OPENING/ LOCKING THE LOCK

1. Wake the lock up by tapping the button on the bottom of the base (just like before).

2. On the Scroll Note: Click UNSHACKLE and slide across to right side.

3. PadLock unlocks! (Note the first time you open the lock there maybe a 10-20 second delay unlocking while the system checks your credentials. This delay should only occur on your first use.)

4. Lock the cable back after each use! An unsecured boat ramp allows unauthorized users and non residents to launch.

5. When boating, wear life jackets, observe safe speed limits, No Wake zones (including the 100 foot, and shallow water areas), and   all other regulations contained in the Lake Rules and Fishing Regulations.
